Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, 21-28 and 62-69, drawn to a system and method directing a user to a server based on the identity of the user, classified in class 709, subclass 239.
 - II. Claims 10-20, 34, 51-61 and 70-75, drawn to a system and method for reply a request from a user with the access rule, classified in class 709, subclass 219.
 - III. Claims 29-33, 35-50 and 76, drawn to a system and method for performing traction based on whether the user has not exceeded a maximum rate usage level, classified in class 705, subclass 67.
2. The inventions are distinct, each from the other because of the following reasons: Inventions I, II and III are disclosed as different combinations which are not connected in design, operation or effect. These combinations are independent if it can be shown that (1) they are not disclosed as capable of use together, (2) they have different modes of operation, (3) they have different functions, or (4) they have different effects. (MPEP 806.04, MPEP 808.01).

Art Unit: 2154

In the instant case, invention I is directed to a method comprises the step of identifying a server based on the identity of the user. The invention II is directed to a method comprises the steps of searching for access rule in a database and performing an API function call to the URL of the API server. The invention III is directed to a method comprises the step of determining the maximum number of transaction.

3. These inventions are distinct for the reasons given above, and the search required for each Group is different and not co-extensive for examination purpose. For example, the searches for the four inventions would not be co-extensive because these groups would require different searches on PTO's classification class and subclass as following:

(a) the Group I search (claims 1-9, 21-28 and 62-69) would require use of search **Class 709, subclass 239.**

(b) the Group II search (claims 10-20, 34, 51-61 and 70-75) would require use of search **Class 709, subclass 219.**

(c) the Group III search (claims 29-33, 35-50 and 76) would require use of search **Class 705, subclass 67.**

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected

Art Unit: 2154

invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

5. Applicant is reminded that the required for response to this requirement is 30 days, not one month.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jinsong Hu whose telephone number is (571) 272-3965. The examiner can normally be reached on 8:00 AM - 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John A. Follansbee can be reached on (571) 272-3964. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
